Almost any physician of reputable practice is qualified to tell us that the intemperance that agitates society and puzzles legislatures is after all not the most subtle or dangerous that affliets the country. Disease in its varied and nente manifestations, is to be dreaded, not simply because it intliets immediate injury upon the body and sometimes the mind, but because it so often opens wide the door to the habit of opinin eating, which is a greater evil than almost any disease can be. It is not easy to satisfy our sense of justice by holding the vietims of this lubit to a strict moral accountability, for about the first effect of the drug used habitually is to deaden the will power and make the partaker a slave to a craving that was planted independently of his own motion. Women are the greatest sufferers. The nervous disorders to which they are subject, and the pains and maladies which attack them in myriad forms, seem to drive the doctor to the morphine bottle as the inevitable resort for the relief of his patients. This is like feeding babies upon soothing; syrups. It accomplishes what it is intended to accomplish for the time being, but it exacts a penalty which it tikes the suffering and sometimes the agony of a lifetime to satisfy. Alcoholic stimulants never establish a mastery over body and mind in the same short period of time that suffices to implant the opinin craving in an ordinary luman manifest themselves even to the most ordinary observer. The effects of opinin, on the other hand, almost defy detec tion by the experienced eye of the skillful physician. Those under its influence are lively, cheerful, frequently brilliant, and they get the eredit of being in excellent health and spirits, when, in fact, they are in deadly warfare with all the laws of physical and moral health. The result of this now wide-spread practice, which is as secret as it is terrible, is to enfeeble the generations that come from these impure sources. The importation, and, we suppose, the consumption of opium in this country has increased 140 per cent. during the last four years, and we fear the doctors are responsible for not a little of this startling exhibit. They should use opium and its preparations only in very extreme cases, and then not long enough or regularly enough to create a craving. Otherwise they may be and in many eases will be, laying the train for habitual opium exhibaration and drunkenness, which is almost worse than

He could not talk at all. He was not an entertaining person. He was a rigid military man; educated at West Point, he had learned his lesson well, and applied it unflinehingly. I remember a single order which he always enforced, which, in my mind, accounted for a good deal of his success. It was that, whenever we stopped on a march the wagons must go to the side of the roud, and be unhitched with their tongues pointing to the road, so they could be driven either up the road or down. Now that would seem to be a simple thing, but it accounts for the remarkable cclerity of Jackson's marches. Suppose a man would stop and his wagon tongue would point the wrong way, and at a certain hour in the morning he would begin the march, and that the wagon would block up the road? If

Roller Skatling at the Capital. So it happens, writes a Washington brrespondent, that Washington has nore proficients on roller skates to the forld, and that certain classes of her pulation have mannerisms as peculiar roller skaters as are the unconscious dianical movements of a blacksmith tracteristic and typical with all his ild. Wherever there is a declivity, as Capitel Hill, roller skaters most do ngregate. They go up the incline in oals, as it were, every individual girl or boy, or man or women, bending to his r her work with patient, cheerful lacrity. Coming down they pool their sues, and form in line behind a leader, he, with his coat-tail in firm grasp of he boy behind him, gives momentum to he whole column, every individual standig stiff and prim on the rollers. After etting the line in motion the leader ses up, and standing like the others, go whizzing down the hill. Once airly started, there is a letting go of pat-tails or apron strings or hands and iched fragment of the line. Here comes the delusive or deceptive feature of ie scheme, and the unconscious menamical movement that has grown into mannerism. If all goes well, that skim own Capitol Hill is worth a week's fun lventure. Those who enjoy coasting tute for coasting it is rarely that all does go well. If the leader tumbles, all tumble, or if any one down the line tumbles, all behiml him tumble. Every skater seems to understand this, and they are so confident in their expectations of having to sit down in the face of a catastrophe, hat they seem always in the act of getting ready to sit down. When the catastrophe comes, or rather on the instant it threatens, every boy or girl sits down promptly, but easily, with a movement that reminds one of the mechanism of the conventional stage fall. The majurity remain in sitting posture until some boy who has good command of his legs reaches an upright position and pro-eecds to assist the others. Then they glide in a subdued way to the bottom of the hill, scattering as the spirit moves them. Often some tyro on roller skates is left to regain his footing himself, or some boy with a bloody nose, or a sprained ankle, or a bruised hand, is left stranded and disconsolate on the curbstone. Ninetcen times in every twenty these combination movements end in disappointments, but hour after honr, and and began the construction of an artilday after day, the roller skaters, shutting their eyes to all disappointments, continue to take the risks.

To-day we hold the balance of political power in Idaho; we rule in Utah absolutely; and in a very short time we will hold the balance of power in Arizona and Wyoming. A few months ago President Snow, of St. George, set out with a band of priests for an extensive tour through Colorado, New Mexico, Wyoming, Montana, Idaho and Arizona to proselyte. We also expect to send missionaries to some parts of Nevada, and we design to plant colonies in Washington Territory. In the past six months we have sent more than 3,000 of our people down through the Sevier Valley to settle in Arizona, and the movement still progresses. All this will help to build up for us a political power that the demagognes will be forced to recognize. A. E. Outerbridge, of this city, has a Japanese coin 400 years old, that possesses an interesting history. It is said to be the only one of the kind that has ever come into the possession of a foreigner. A few years ago the Japanese Ambassador at Washington asked the advice of Colonel Thomas A. Scott, of this eity, in relation to the selection of an engineer competent to superintend the construction of certain important public works in Japan. Colonel Scott suggested Joseph W. Crawford, of Pennsylvania, then eugaged on the Texas and Pacific Railroad. Mr Crawford sailed for Japan lery road in the northern part of the Japanese possessions. The enterprise was regarded as a very difficult one, but was finished so much to the satisfaction of the Japanese Government that Mr. Crawford was immediately engaged to construct the Polonai Railroad. When the latter road was opened, Mr. Crawford was decorated with the Order of the Rising Sun and presented with the coin in question, which is of gold, 32-100 foot in diameter and weighs 4 9-10 ounces .-Philadelphia Times.

The Origin of Ball Games, The history of the hall games, which commences in the spring months of the yenr, would carry us back a very long way, for the origin of ball play dates from eyond history itself, and traces of it are to be found in almost every nation on the face of the globe. It is even supposed that it had a deep smybolical meaning when tirst played in the spring of the year, and that the tossing of the ball was intended first to typify the upspringing of the life of nature after the gloom of winter. And whether this was the case among the people of antiquity or not, it is a remarkable fact the ecclesiastics of the early Church adopted this symbol, and gave it a very special significance by neeting in the churches on Easter day and throwing up a ball from hand to hand to typify the resurrection. This, which was done originally as a kind of religious observance, soon denegrated it to a mere custom, and had to be discontinued, as it caused much disorder; but it will account for the faet that games at ball are supposed to commence properly at Eas-In England these games of ball have "Stoolball," a gume played by two per-

But perhaps the most popular us well as the most ancient game was tennis. This sport was classical—at least hand tennis was-and was doubtless played when Homer wrote, and it certainly was popuar when Horace satirized the "swells' of his period. As one of the most ancient games of Christendom, it perhaps came lown to us from the monks, who followed the harmless pastime in their cloisers, which made capital tennis courts. But it would seem that women and girls played, as well as men and boys, for as ng ago as 1424 there was a young lady n Paris named Margot, who played both with the palm and the back of the hand, and was the champion of the game. - The Boy's Own Newspaper,

No Bread for the Children. If anyone ever invents a greater folly than the so-called labor strikes, it is to be hoped his machinations will never fall upon its helpless victims. Every day of idleness means a day's wages thrown away; it means a certain amount of money wasted that every workingman's family needs; a pair of boots for a boy; a dress for a girl; a third of a barrel of flour; two or three bushels of potatoes; twenty pounds of meat. It means a portion of the necessaries or comforts of life snatehed from a family. How He Got Sohl. A well-known sportsman of Crescent, it is said, was in New York a short time ago seeing the sights. Among other places he visited was a sale stable, where he took excessive pains to let them know he was a great sport and was up to all the dodges of the trade. He bragged so much they determined to sell him. He was accordingly shown, in confidence, a large box filled with excellent robes and harness, worth at least \$400, which he was informed had been stolen, and he could get them cheap. He bought the lot at \$75, and ordered them shipped. For \$1,001 will send recipes for keeping ggs fresh for years in any climate.
